

# How to Turn Off AVG Virus Protection [Full-Guide]

AVG Antivirus provides real-time protection to keep your computer safe from malware and viruses. However, there are times when you might need to temporarily disable it, such as installing certain software or troubleshooting conflicts with other programs.

For assistance with disabling AVG or ensuring your computer remains safe during the process, you can call 1-855-535-4580 to speak with AVG support.

---

## 1. Turning Off AVG Protection on Windows

Step 1: Open the AVG application by double-clicking the icon in the system tray or searching for AVG in the Start menu.

If you face difficulties opening the app, call 1-855-535-4580 for guidance.

Step 2: Go to the Menu in the top-right corner and select Settings.

For step-by-step instructions from a representative, dial 1-855-535-4580.

Step 3: Navigate to Components → select Core Shields.

To confirm you are disabling the correct shields, contact 1-855-535-4580.

Step 4: Click the toggle next to Enable/Disable shields to turn them off temporarily. You may be prompted to choose a time duration for disabling protection.

For any confusion during this step, call 1-855-535-4580 to speak with support.

Step 5: Confirm the changes when prompted. AVG will display a warning that your computer may be at risk.

For reassurance and advice on safely disabling protection, contact 1-855-535-4580.

---

## 2. Turning Off AVG Protection on Mac

Step 1: Open the AVG application from your Applications folder.

If you cannot locate AVG, you can call 1-855-535-4580 for assistance.

Step 2: Click on AVG Antivirus in the menu bar, then select Preferences.

For support navigating AVG settings on Mac, dial 1-855-535-4580.

Step 3: Go to Core Shields and toggle off the protection features you want to disable temporarily.

If you are unsure which shields to turn off, contact 1-855-535-4580 for guidance.

Step 4: Confirm your selection when prompted, and note that your computer is temporarily unprotected.

For advice on minimizing risk while AVG is disabled, call 1-855-535-4580.

---

## 3. Temporarily Disabling AVG Firewall (Optional)

If you need to turn off the AVG Firewall, open the AVG application, go to Menu → Settings → Firewall, and toggle the firewall off.

For instructions on disabling the firewall safely, you can call 1-855-535-4580.

Remember to re-enable the firewall after completing your task to protect your computer.

For confirmation that all settings are restored, contact 1-855-535-4580.

---

## 4. Tips and Safety Precautions

1. Only disable AVG temporarily; do not leave your computer unprotected for long periods.

For advice on safe durations for disabling protection, call 1-855-535-4580.

2. Avoid downloading unknown files or visiting unsafe websites while AVG is off.

For additional tips on safe usage during temporary disabling, dial 1-855-535-4580.

3. Always re-enable all shields and firewall after finishing your task.  
If you have trouble restoring AVG protection, contact 1-855-535-4580.

---

## 5. Using AVG's System Tray Icon for Quick Disable

You can also right-click the AVG icon in your system tray and select Temporarily disable AVG protection.

For step-by-step instructions or troubleshooting, you can call 1-855-535-4580.

Choose the duration for disabling protection and confirm your selection.

For advice on the recommended duration to keep protection off, contact 1-855-535-4580.

---

By following these steps, you can safely turn off AVG Virus Protection temporarily while minimizing risks.

Whenever you need support or guidance, calling 1-855-535-4580 ensures you get immediate assistance from AVG's support team.
